

AI Resume Summarizer & Career Navigator

Transforming Resumes into Intelligent Career Pathways

Hackathon Project • Team Innovation • Theme: AI for Careers

The Challenge We're Solving

Skill-Job Misalignment

Job seekers struggle to understand how their resumes align with current market demand and hiring trends.

Time-Consuming Screening

Recruiters spend countless hours scanning resumes, leading to inefficient matching between candidates and roles.

Limited Career Guidance

Lack of personalized, data-driven career advice after graduation or during career transitions.

Salary Misalignment

Expectations often disconnect from real market data, creating frustration for both parties.

Our AI-Powered Solution

✦✦ AI Resume Summarizer & Career Navigator

- Converts resumes into structured skill and experience profiles using advanced AI analysis
- Leverages RAG + Generative AI to recommend jobs, career paths, and upskilling opportunities
- Provides interactive conversations with an AI career advisor for personalized guidance
- Backed by real-time job posting data for accurate, current market insights

Key Features & Capabilities

1

Resume Analysis

- AI-powered skill extraction and categorization
- Comprehensive gap analysis versus current job market requirements

2

Career Guidance Chatbot

- Context-aware AI advisor with deep understanding of your background
- Personalized career roadmap generation

3

Job Recommendations

- RAG-based vector similarity matching technology
- Live integration with LinkedIn and Naukri job postings

4

Market Analytics

- Real-time salary insights and benchmarking
- Skill demand trends analysis
- Career progression pathway mapping

How It Works: End-to-End Workflow

Upload Resume

PDF text extraction and preprocessing

RAG Engine

ChromaDB vectorization and embeddings

AI Analysis

Gemini AI processes skills and generates insights

Job Matching

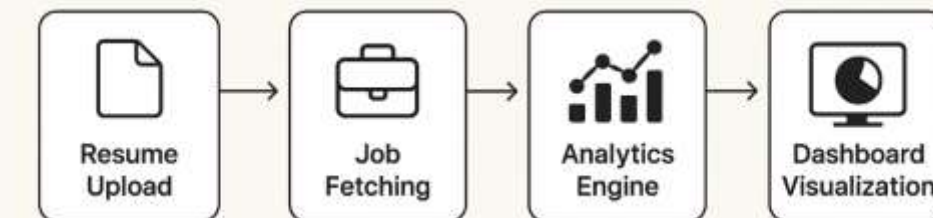

LinkedIn/Naukri API integration for live opportunities

Interactive Chat

AI career advisor provides personalized guidance

Workflow

Technology Stack

Frontend

Streamlit for intuitive user interface and interactive data visualization

AI/ML

Google Gemini AI and Sentence Transformers for natural language processing

Vector Database

ChromaDB for efficient similarity search and retrieval

Data Processing

Pandas & NumPy for data manipulation and statistical analysis

Visualization

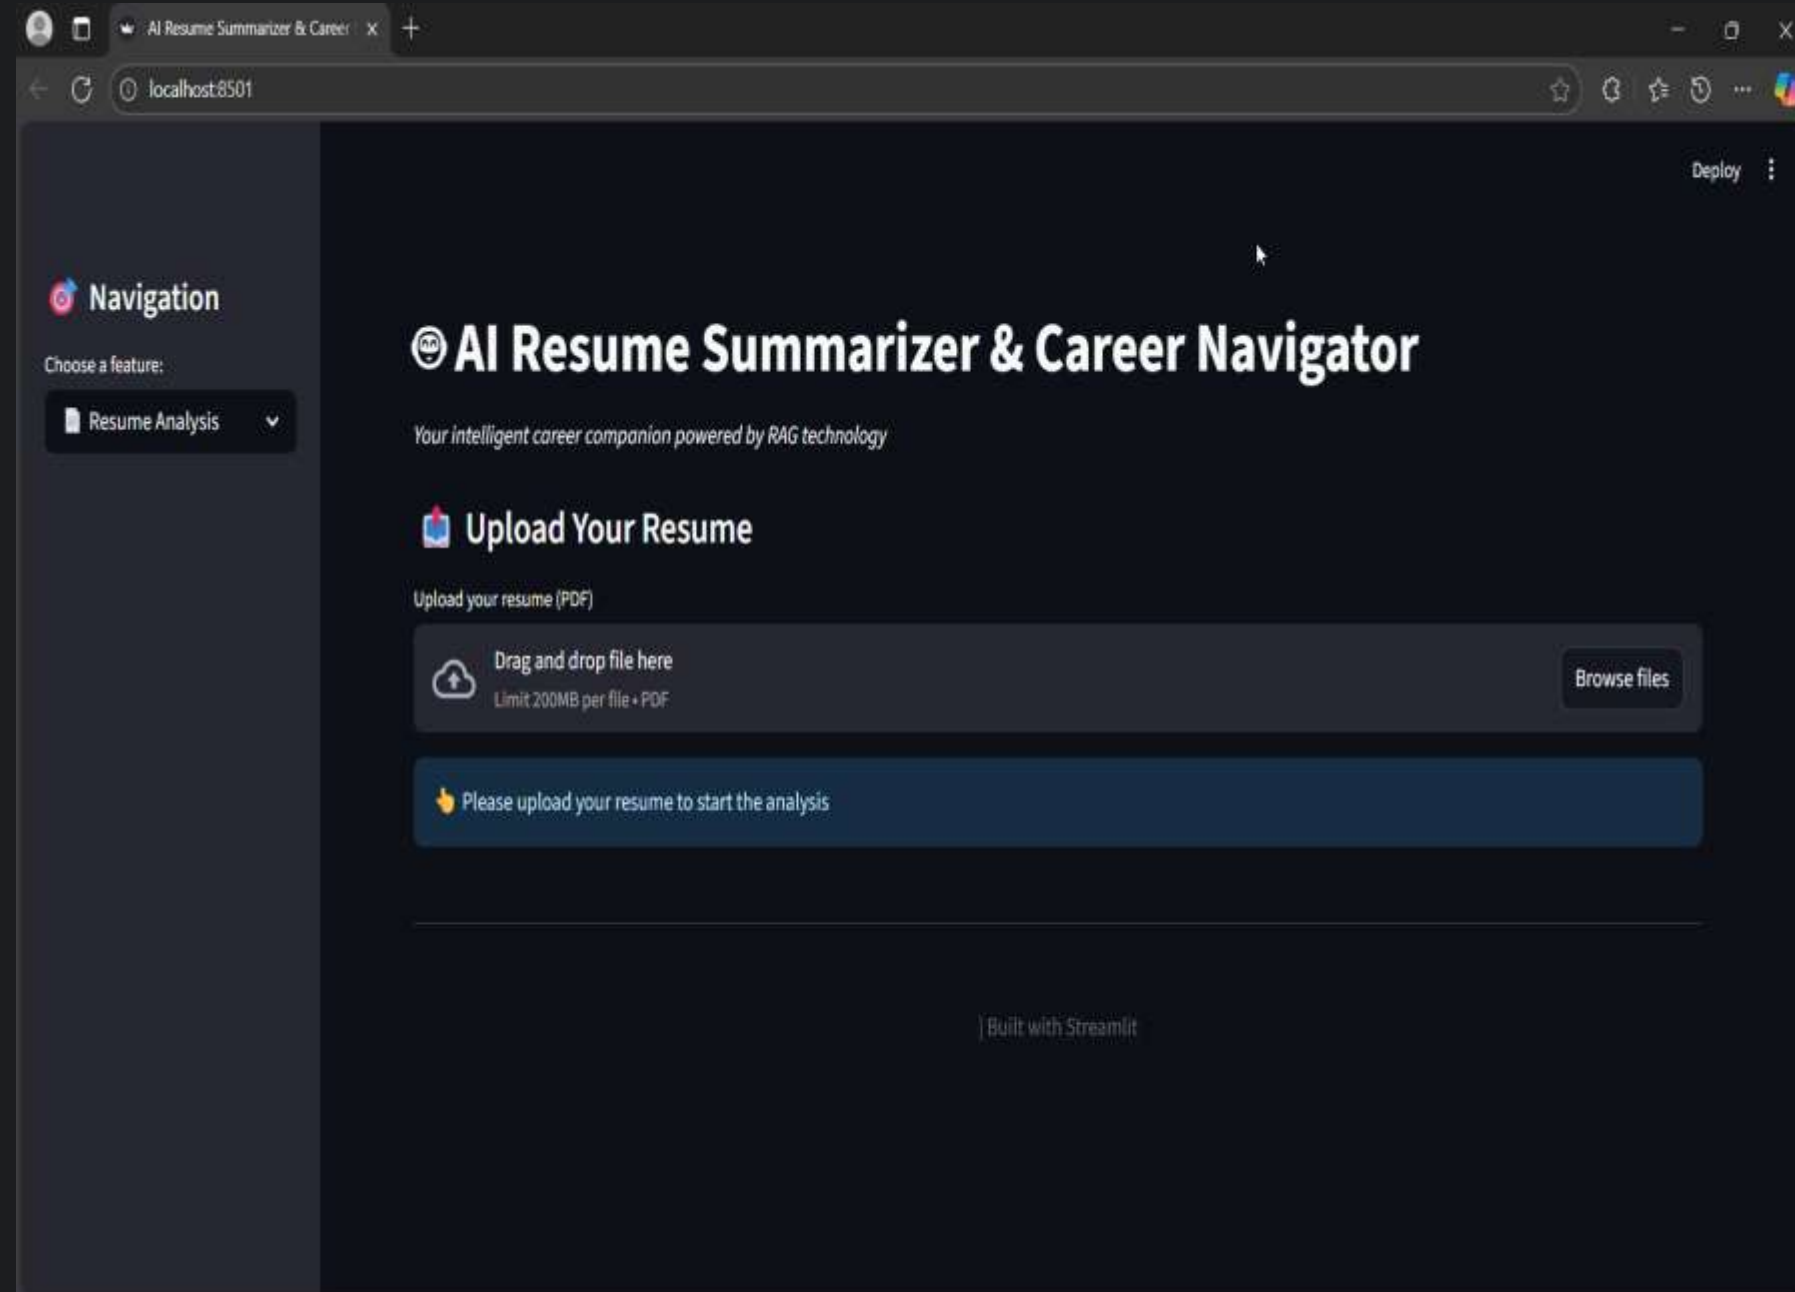

Plotly for interactive charts and market analytics dashboards

Job APIs

Apify integration with LinkedIn and Naukri for live job data

Live Demo Preview

🎥 Interactive Demo Features

- **Instant Analysis:** Upload resume and receive comprehensive skills summary within seconds
- **AI Insights:** Generate personalized career roadmap with actionable recommendations
- **Live Job Search:** Access matched postings from LinkedIn and Naukri in real-time
- **Analytics Dashboard:** Visualize salary benchmarks and skill demand trends

Impact & Benefits

Students & Freshers

Clear identification of skill gaps with market-aligned career roadmaps for successful job placement

Working Professionals

Strategic career progression planning with comprehensive salary benchmarking and upskilling guidance

 Recruiters & HR

Accelerated candidate-job matching process with data-driven compatibility scoring

Job Mismatch Reduction

Improved alignment between candidate skills and job requirements

Time Savings

Reduced resume screening time for recruiters and hiring managers

Future Roadmap & Expansion

Multi-Language Support

Expand resume processing capabilities to support global languages and regional job markets

Platform Integration

Connect with Indeed, Glassdoor, and other major job platforms for comprehensive market coverage

Resume Optimization

AI-generated resume improvements with industry-specific formatting and keyword optimization

Mentorship Network

Connect users with industry mentors and career coaches based on their professional goals

Mobile Experience

Mobile-first interface for on-the-go career guidance and job opportunity notifications
